Who Am I?

I am a soft-spoken individual, who really enjoys what they do. I enjoy spending my free time with my partner & family. I am creative at heart. I love the visual aspect of applications, however a good balance between good UI and UX design is satisfactory, I make music, do graphic design and code, every chance that I get. I enjoy teaching others and passing on the knowledge I've acquired, in a simplistic manner. I'm eager on adding value to the lives of others. I've learnt how far courtesy, and patience can take a person.

Education

Higher Certificate in Information Technology Service Management

Institution: Cape Peninsula University Of Technology
Year Completed: 2022
